To The Residents of Minnesota:

As a public school, a charter school necessarily incurs the public's trust, both in expending public funds and in educating public school children.

As an authorizer of charter schools, Friends of Education believes it also incurs the public's trust in fulfilling its oversight obligations. The purpose of this report is to honor that trust by reporting, to the public, the academic and fiscal performance of Friends of Education authorized charter schools.

Three Pillars of Academic Achievement

- Absolute Proficiency
- Comparative Proficiency
- Growth

ABSOLUTE PROFICIENCY

Expecting proficiency for each student, Friends of Education evaluates the percentage of students meeting or exceeding state standards on the state tests (MCA-II).

Students are tested in grades 3-8 & 10 for Reading and 3-8 & 11 for Math.

COMPARATIVE PROFICIENCY

Expecting each charter school to fulfill its statutory obligation to improve student performance, Friends of Education evaluates how well the charter school performs compared to a nearby district school that the charter school students would otherwise likely attend.

GROWTH

Expecting growth for each student, Friends of Education evaluates the growth each student achieved on the state and other assessments.

Because all schools take the state tests, for comparison purposes, only the growth results from the state tests are reflected in this material. The Minnesota Department of Education calculates each student's growth on the state tests from one year to the next and identifies the growth as one of three categories: low, less than one year's growth; medium, one year's growth; and high, more than one year's growth.

¹ Percentage of students meeting or exceeding state standards on the Minnesota Comprehensive Assessments-II.

Minnesota Comprehensive Assessments (MCAs) are the state tests that help districts measure student progress toward Minnesota's academic standards and meet the requirements of No Child Left Behind. The reading and mathematics tests are used to determine whether schools and districts have made adequate yearly progress (AYP) toward all students being proficient in 2014. Reading and mathematics tests are given in grades 3 - 8, 10 and 11.

¹ The Comparative Proficiency is calculated by dividing the percent proficient in the charter school by the percent proficient in the comparison district school and district (for the same grades offered by the charter school). For example, 79% proficiency in the charter school, with 85% proficiency in the comparison district school and 76% in the district as a whole, results in a Comparative *School* Proficiency of 93% (79/85) and a Comparative *District* Proficiency of 104% (79/76). A comparative proficiency of 100% means the charter school performed the same; less than 100% means the charter school did not perform as well, and more than 100% means the charter school outperformed its comparisons.

Note: Comparison schools and districts are identified on the individual School's page in this document.

2009 Summary Performance | Growth

Adequate Growth Performance

Friends of Education evaluates whether its schools are achieving “adequate growth”. Adequate growth is calculated by adding the % of students who scored proficient on the 2009 MCA-II and who achieved medium or high growth from 2008 to 2009 to the % of students who did not score proficient on the 2009 MCA-II but who achieved high growth from 2008 to 2009. The sum of these three growth categories are identified because they are most likely to lead to continued proficiency, for the already proficient student, and increased proficiency for the non-proficient student.

The Adequate Growth Index for each Friends of Education charter school is:

READING	Adequate Growth %	*State Average %	MATH	Adequate Growth %	*State Average %
Beacon Prep	84.6	70.3	Beacon Prep	76.9	57.4
Nova	81.1	64.3	St Croix	75.5	59.6

2009 Summary Performance | Growth

High Growth Performance

Because students achieving high growth are likely to continue to achieve proficiency and advance, Friends of Education evaluates the percentage of students achieving high growth. The high growth performance in each Friends of Education charter school is:

READING	High Growth %	*State Average %	MATH	High Growth %	*State Average %
Beacon Prep	69.2	40.5	Beacon Prep	53.8	31.4

Low Growth Performance

Inasmuch as low growth students will not advance, Friends of Education evaluates the percentage of students achieving low growth. The low growth performance in each Friends of Education charter school is:

READING	Low Growth %	*State Average %	MATH	Low Growth %	*State Average %
Beacon Prep	7.7	19.1	Cologne	9.5	26.3

Financial Performance Measures:

External Audits

Friends of Education evaluates each charter school's external audit for material weaknesses, significant deficiencies, and other deficiencies. Friends of Education expects its schools to work towards elimination of deficiencies.

Finance Award

Friends of Education considers whether a charter school has received the Finance Award from the Minnesota Department of Education, which recognizes sound fiscal health and management policies and procedures.

Financial Statements

Friends of Education reviews each charter school's monthly financial statements and the school's annual consolidated financial statement. Friends of Education encourages schools to establish and maintain a healthy fund balance.

¹ The Minnesota Department of Education recognizes school organizations that exhibit sound fiscal health and financial management policies and procedures. The criteria for earning a School Finance Award is based on compliance with state statute on a number of finance issues and other means of demonstrating fiscal health.

2009 Summary Performance | Cost Index

Friends of Education compares the pupil cost in the charter school with the pupil cost in the traditional district in which the charter school is located; this is called the “Cost Index”. The Cost Index is calculated by dividing the charter school per pupil cost by the traditional district per pupil cost. For example, a charter school per pupil cost of \$8,563 compared with a traditional district cost of \$9,622 results in cost index of 0.89, or 89% of district cost.

Friends of Education recognizes that numerous factors affect per pupil cost, including enrollment, years in operations, and programs offered. The Cost Index is simply one tool Friends of Education utilizes in evaluating charter school performance.

2009 Summary Performance | Taxpayer Value Index

Recognizing that public tax dollars finance public charter schools, Friends of Education measures the financial return on the taxpayer investment.

The Value Index, or Taxpayer Value Index, is calculated by dividing the average of the Comparative Performance Indices (how well the charter school is performing compared with a traditional district school with comparable demographics) by the Cost Index (the per pupil cost in the charter school divided by the per pupil cost in the traditional district). For example, a charter school with an average Comparative Performance Index of 1.06 (106% of district performance) and a Cost Index of 0.89 (89% of district cost) results in a Taxpayer Value Index of 1.19: *the taxpayer receives a \$1.19 return for every \$1.00 spent in the charter school.*

The 2009 Taxpayer Value Indices for each Friends of Education charter school is:

2009 Taxpayer Value Index	
Minneapolis Academy	1.87
New Millennium Academy	1.84
Yinghua Academy	1.67
St Croix Preparatory	1.63
Nova Classical Academy	1.53

The Academy is the first independent college preparatory middle school in Minneapolis, providing children from all walks of life and of all abilities with an educational opportunity that is generally not available to most lower-income and working class families.

Founded by educators, and community leaders, the Academy's Primary Mission is to provide all of its students with the knowledge, skills, and character to graduate from high school, and the confidence to continue on and successfully complete their post-secondary education.

The Academy will accomplish this through a college preparatory educational program based on high expectations, rigorous academic performance, more time on task, and, a safe and orderly environment driven by high standards of personal conduct and respect for others.

Using educational innovations and strong parent/community participations, the mission of New Millennium Academy is to maximize student achievement for children from primarily low-income families, whose home language is often Hmong rather than English. Pride in accomplishment, civic responsibility and morally correct behavior will become the cornerstones of the educational development of our children.
