

Amasty Extension Installation Guide

1. Login into the backend and go to System >> Cache Management >> Enable All Cache Types
2. Go to System >> Tools >> Compilation and make sure it says "Compiler Status: Disabled". Otherwise, please disable the compilation:

3. Upload all the extension files from "step1" folder to the root folder of your Magento installation:

4. Upload all the extension files from "step2" folder the same way as in the previous step of this Installation Guide.
5. Go to System >> Cache Management page at your Magento backend, and click the "Flush Cache Storage" button. After this action, the extension is installed.
6. If you need to enable Compilation, please go to System >> Tools >> Compilation and click "Run Compilation Process" button.
7. Please log out from the backend and log in again for Magento to refresh permissions.
