

Thank you for calling to let me know that you will be making your building smoke free. On behalf of Minnesota renters seeking the benefits of smoke-free rental housing, thank you for transitioning your building to make it full of fresh air and a healthy living space! As you know, providing a smoke-free building leads to:

- Buildings that are healthier, especially for children and seniors
- Buildings that are safer because fire dangers are reduced
- Buildings where maintenance is reduced
- Buildings that hold their value because cigarette burns on counters, carpets, and other places are eliminated

Enclosed are some information on the steps to transitioning to a smoke-free building. Please feel free to copy our materials to give to your tenants to help inform them about your new policy. Live Smoke Free is available to help you along the way if you need more materials.

Once your building becomes completely smoke free, we will be happy to post your building indefinitely on our free online smoke-free apartment directory. We have also created some signs and other implementation materials that you can order for your community. Please let me know if you require any signs or further materials. **All of our materials, signs, and assistance are free of charge.**

As you move forward with the transition process, remember that Live Smoke Free is here to help in any way we can. Please contact us if you have any questions, or to give us updates on your progress.

Thanks again for providing a smoke-free building!

Sincerely,

Live Smoke Free
